BILLORA ERP

Smart GST Billing & Stone Inventory ERP System

Client Operations Manual: How to Add Stock & Manage Inventory

Official Guide for Registering Purchasers (Suppliers), General Goods & Stone Items (Granite & Marble)

Welcome to Billora! This operations manual walks your administrative and inventory staff through the standard operating procedures for cataloging goods, registering wholesale stone purchasers/suppliers, and properly structuring dimensional stone items (Granite slabs, Marble blocks, Quartz, and Adhesives). Proper data entry ensures seamless billing, automated stock deductions, and real-time Daybook accounting.

1. How to Add Purchasers / Stone Suppliers

Purchasers (Suppliers / Quarry Vendors) supply raw granite blocks, gangsaw polished slabs, and consumables. Registering their profile accurately establishes their accounts payable ledger and enables GST Input Tax Credit (ITC).

- **Step 1:** Navigate to the top navigation bar and click **'Contacts'**.
- **Step 2:** Click the blue **'+ Add Contact'** button in the top right corner.
- **Step 3:** Set **Contact Type** to **'Supplier'** (or *'Both'* if they also purchase goods from you).
- **Step 4:** Enter the Supplier's **Full Name** and **Company Name** (e.g. *'Rajasthan Granites & Quarry Mines Ltd'*).
- **Step 5:** Provide primary **Mobile / Phone** and **Email** for purchase orders and payment receipts.
- **Step 6:** Enter the Supplier's **15-digit GSTIN** (e.g. *08AABCR1234F1Z5*). This is vital for GST 3B tax reconciliation.
- **Step 7:** Specify the **Quarry / Yard Address, City, and State**.
- **Step 8:** If there is an existing credit balance from prior transactions, enter it into **Opening Balance** with **'To Pay'**.
- **Step 9:** Click **'Save Contact'**. The supplier is now ready to receive Purchase Bills.

Field	Example Value	Description / Purpose
Contact Type	Supplier	Identifies entity for purchase vouchers & payables
Name	Rajasthan Granites Ltd	Quarry or distributor company name
GSTIN	08AABCR1234F1Z5	Required for GST B2B purchase bills
Balance Type	To Pay	Initial outstanding payable to vendor
Credit Limit	■ 5,00,000	Maximum credit threshold before payment block

2. How to Add General Inventory Items

General items include consumables, chemicals, tools, epoxy sealants, diamond blades, and hardware accessories. These are typically sold in units of *piece, box, kg, or packet* rather than square feet.

- **Step 1:** Click **'Products'** in the top navigation bar.
- **Step 2:** Click the **'+ Add Product'** button.

- **Step 3:** Enter the **Product Name** (e.g. *'Tenax Epoxy Stone Adhesive 5kg'*).
- **Step 4:** Provide a unique **Product Code / SKU** (e.g. *'BIL-ADH-005'*). If left blank, Billora auto-generates one.
- **Step 5:** Select or type the **Category** (e.g. *'Adhesives & Chemicals'*).
- **Step 6:** Choose the **Unit** of measurement: select **'box'**, **'piece'**, or **'kg'**.
- **Step 7:** Set the **HSN Code** (e.g. *'3506'* for prepared glues & adhesives).
- **Step 8:** Enter **Purchase Price** (vendor cost) and **Selling Price** (retail/wholesale price before or after tax).
- **Step 9:** Set **Tax Percent** to **18.0%** (Standard GST rate).
- **Step 10:** Enter **Opening Stock** (current inventory on hand) and **Minimum Alert Stock**.
- **Step 11:** Click **'Save Product'**.

3. How to Add Stone Items (Granite, Marble & Natural Slabs)

Natural stone items (Granite, Marble, Quartz, Sandstone) have unique industry attributes: they are measured in **Square Feet (Sq.Ft)**, categorized under **HSN 6802**, and vary by thickness, polishing finish, and quarry origin.

- **Step 1:** Click **'Products'** -> **'+ Add Product'**.
- **Step 2:** Enter the authentic **Stone Name** (e.g. *'Black Galaxy Granite Slab'* or *'Italian White Carrara Marble'*).
- **Step 3:** Set **Category** to **'Granite'** or **'Marble'**.
- **Step 4:** Set **Unit** to **'sqft'** (Crucial: all sales rate math calculates per sq.ft).
- **Step 5:** Enter **Size / Thickness** in the description field (e.g. *'18mm Premium Gangsaw Polished Slabs'* or *'20mm Honed Slabs'*).
- **Step 6:** Enter **HSN Code: '6802'** (Worked monumental or building stone & articles thereof).
- **Step 7:** Enter **Purchase Price (■/sqft)**: Quarry cost per square foot.
- **Step 8:** Enter **Selling Price (■/sqft)**: Base billing rate per square foot.
- **Step 9:** Set **Tax Rate** to **18.0%** (standard GST for processed marble/granite slabs).
- **Step 10:** Enter **Opening Stock in Total Sq.Ft**: e.g. *1200.0* sqft.
- **Step 11:** Click **'Save Product'**.

```
Square Feet (Sq.Ft) Calculation Formula for Slabs:
Sq.Ft per Piece = (Length in inches × Height in inches) ÷ 144
Total Billable Sq.Ft = Sq.Ft per Piece × Number of Slabs
Example: A slab of 108 inches (9 ft) × 36 inches (3 ft) = 3,888 ÷ 144 = 27.0 Sq.Ft. If customer buys 10 slabs, Quantity = 270.0 sqft.
```

Product Name	Category	Unit	Size / Thickness	HSN	Rate (■/sqft)	Opening Stock
Black Galaxy Granite	Granite	sqft	18mm Polished Slabs	6802	■ 175.00	1,200 sqft
Italian Carrara Marble	Marble	sqft	20mm Imported Slabs	6802	■ 350.00	800 sqft
Tan Brown Granite	Granite	sqft	18mm Polished Slabs	6802	■ 98.00	1,500 sqft
Kishangarh Wonder White	Marble	sqft	16mm Mirror Polished	6802	■ 85.00	1,000 sqft

4. Admin Panel & Dynamic Client Fields Guide

In Billora, specialized administrative modules (Backup & Migration, Dynamic Client Fields, Data Reset) are strictly restricted to the **Admin Panel** to protect operational security. Non-admin staff (Cashiers, Yard Keepers) have view and billing access only.

- **Configuring Dynamic Client Fields:** In the Admin Panel, select **'Dynamic Client Fields'** to add custom properties for your stone clients.
- **Common Field Examples:** *'Site Delivery Route'* (text), *'Alternate WhatsApp Phone'* (text), *'Architect / Contractor Name'* (text), *'Payment Credit Period'* (number), *'Preferred Stone Finish'* (select dropdown).

• **Automatic Form Binding:** Once added in the Admin Panel, all client creation forms dynamically render these fields.

• **Automated Daily XML Backup:** Configured to send an encrypted XML database snapshot daily at 11:00 PM to ajojohn.dev@gmail.com and sync with Google Drive.

5. Invoicing & Automated Daybook Accounting Flow

Every time a sales bill is generated in Billora, the ERP executes three simultaneous automated updates:

• **1. Stock Reduction:** The exact square footage or unit count is instantly decremented from product current stock and logged into stock_movements.

• **2. Customer Balance:** If the bill is partly paid or credit, the unpaid balance is automatically added to the customer's receivable balance.

• **3. Daybook Inward Entry:** All collected payments (Cash, RTGS, UPI, Cheque) post immediately into the **Daybook**, maintaining real-time daily cash and bank balances.
